# CANEA **strategy**

Strategy Activation

CANEA Strategy helps you to create a broad understanding of and great commitment to the strategy by links to the daily operations.

Make reality of the strategy

CANEA Strategy makes it possible for organisations of all sizes to create a unique common thread from the strategic work to the daily operations. We do not just provide performance management tools but rather a completely new generation of IT support for strategy activation. The system guarantees and provides support throughout the chain from strategy to execution. You get no results without action. CANEA Strategy makes it possible in practise!

Agile strategy development

The world is changing at an increasing speed and all organisations need to evaluate their strategy continuously in order to be able to plan and act in the best way based on the current conditions. With the help of CANEA Strategy, you can dramatically accelerate the process from word to action to get everybody to work in a new way, with a change in focus or towards a new goal.
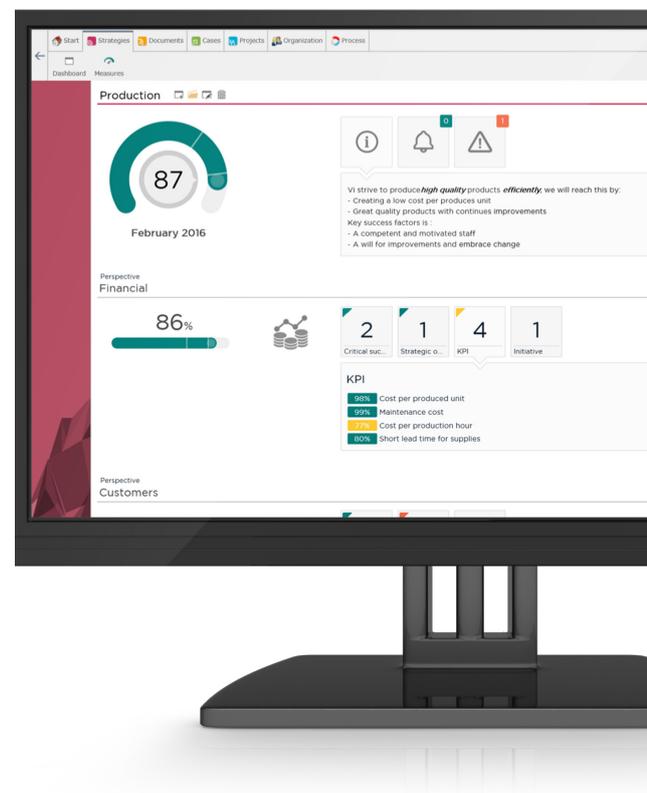

> ”CANEA Strategy will help us to get more involvement from our employees regarding our strategy, but above all a silver thread and concrete approach that further increases the chances that we will reach our goals.”
>
> Gunnar Peters, CEO
> BEMAB

Some of our customers:

CANEA

CANEA Strategy

The system is characterized by the easy to use interface, high flexibility and modern technical architecture. CANEA Strategy is available in several languages and is used by both large and small organizations in many industries. The system is web based and developed in. Net Framework with SQL database and can be installed on your server or hosted.

Functions

Strategy modelling - The Strategy Modelling Function allows you to break down your company vision into tangible objectives and metrics. It is intuitive to use and provides a clear view of how to achieve your vision.

Dashboard – The Strategy Dashboard does not only display a complete view of your company goals, the path to get there and the current status. The Dashboard is a useful vehicle to visualize and communicate your strategy throughout the organization.

KPI management – The KPIs in CANEA Strategy allows for easy monitoring of operations. KPI settings are very agile and can easily be defined to your specific and changing needs. Since KPIs can be aggregated, you have the possibility to get a quick overview of the current status of the company.

Integration and automation – Commonly, KPIs are generated utilized in multiple systems. CANEA Strategy can easily be integrated into the eco-system in order to automate the processes.

Initiating projects and action plans – A strategy without an action plan will never be realized! When using CANEA Strategy, and other CANEA ONE modules, you can easily launch strategic initiatives and actions and create a clear connection between your goals and how to achieve them.

Version management – Strategy versions, including all objectives and key figures, are conveniently managed by CANEA Strategy. You work and modify the strategy in edit mode – changes are published only when the new strategy version is due to take effect.

Business Excellence by CANEA ONE
